President's Message

We would like to thank Ken Moore for his dedicated service over the past few terms as President of our Aerie.

There has been interest raised in starting up pool tournaments once again. The suggestions were non-competitive teams with just bragging rights. We would have one table with the more skilled players and the other for beginners and less skilled. We will post a chart in the pool room in July for interested players to sign up. We would require your name and phone number along with preferred days and time. If there's enough interest, we will start in the fall and end with a BBQ in the spring.

Aerie 3386 of Tyndall hosted their annual steak dinner BBQ in their Curling Rink on June 7. The steak was cooked to your own liking and served with baked potatoes, salad and a dessert. It was amazing and a complete sellout. We donated a few items for the silent auction. Hopefully we will be invited again next year and more of our members will have the opportunity to purchase tickets and attend.

Yours fraternally,

Claude Fouillard ~ President, The Fraternal Order of Eagles Aerie #3870

SIGNS OF HEATSTROKE

HIGH BODY TEMPERATURE. A core body temperature of 104 degrees Fahrenheit (40 degrees Celsius) or higher is the main sign of heatstroke.

CHANGE IN MENTAL STATE OR BEHAVIOR. Confusion, agitation, slurred speech, irritability, delirium, seizures and coma can all result from heatstroke.

CHANGE IN SWEATING PATTERN. In heatstroke brought on by hot weather, skin feels hot and dry to the touch. However, in heatstroke brought on by strenuous exercise, sweating may be profuse.

NAUSEA AND VOMITING. Someone with heatstroke may feel sick to their stomach or vomit.

FLUSHED SKIN. Skin may turn red as body temperature increases.

RAPID BREATHING. Breathing may become rapid and shallow.

RACING HEART RATE. Pulse may significantly increase because heat stress places an extreme burden on the heart to help cool the body.

HEADACHE. Heatstroke may cause the head to throb
